

Dear FCC:

Please reject NAS's petition 04-160. I beleive that the broadcaster have ahd ample time to compete with satelte radio. Instead they have used this time not to upgrade their exisiting systems, but to siphon off profits and complain to the FCC.

Let satellite radio compete! Let the market deside if they can provide better service to their local customers! Where I live (Temecula, CA) local braodcast radio is useless! If you commut to the LA or San Diego (like I do) there is no radio station, or set of stations, that gives you the infrmation you need. Satelite radio provides this.

Don't stiffle competionion let satelite radio continu to inovate!

Phil White
